University Diploma Policy	DWCLA' s three educational principles are based on the founding philosophy of the college: 1. Christian education; 2. international education; 3. liberal arts education. With these as a guide, the college aims to nurture and develop independent women possessing the ethical knowledge and strong abilities that will allow them able to work as the cornerstone of society. DWCLA awards degrees to students who meet the required targets set according to departmental, major or graduate school diploma policy or certificate award policy.				・DWCLA has upheld a founding spirit of love and freedom based on Christian teachings. The process of learning to establish oneself is deepened by feelings of love and dedication toward others. Graduates must be capable of contributing to others and society freely and willingly—women who can truly be “the salt of the earth and the light of the world.”																								
					・International education underlines the importance of the ability to see and analyze history and events from an international, objective perspective rather than from the viewpoint of a single country. Graduates need to look at the world from a global perspective beyond differences in religion, culture, language, and ethnicity, and are therefore able to play an important role in international society.																								
					・DWCLA is committed to liberal arts as the core of our education. Graduates are expected to possess deep and extensive knowledge and abilities in their area of specialization and outside, including skills of analysis, thinking, imagination and creativity, presentation, communication, leadership, adaptation, self-management, and self-expression.
